

COMMANDING OFFICER'S ENERGY POLICY STATEMENT

In FY2012, the DoD accounted for 80% of the Federal Government's total energy consumption at a cost of more than \$20.4 billion. The DoD's consumption equates to that of the entire country of Nigeria which has a population of more than 160 million.

It is the policy of MCAS Beaufort to reduce our energy consumption across all activities when feasible and in accordance with DoD and SECNAV strategies. This policy applies to all military, civilian, and contractor personnel. To help achieve Marine Corps energy conservation goals, we will commit to and focus the majority of our efforts and resources on meeting or exceeding the following Energy Policy Act mandated objectives:

By FY 2015:

- Reduce facility energy intensity by 30% of FY 2003 levels.

By FY 2020:

- Reduce facility energy intensity by 37% of FY 2003 levels.
- Increase renewable energy usage by 18.3%.
- Reduce use of fossil fuels by 30% of FY 2005 levels.
- Reduce facility potable water consumption by 26% of FY 2007 levels.

In order to meet these objectives, MCAS Beaufort will employ the following strategies:

- Establish a state-of-the-art Energy Management System (EnMS) at MCAS Beaufort that conforms to ISO 50001.
- Comply with established energy laws, regulations, executive orders, DoD and USMC orders, and ISO 50001.
- Reestablish the Building Energy Monitor program.
- Implement other strategies to conserve energy such as thermostat programming.

We are committed to intergrade risk management practices that promote energy conservation goals while advancing our mission. MCAS Beaufort will identify, assess, manage, and actively seek opportunities to continually improve as well as monitor progress towards realizing our overall energy conservation goals.

All Hands participation is essential. Should you have ideas or see areas of improvement to assist in these efforts, please contact the MCAS Beaufort Public Works Energy Manager at (843) 228-6317.

P. D. BUCK

Colonel, U.S. Marine Corps
Commanding Officer, MCAS Beaufort
