

### Energy Reduction Progress

# Energy Objectives and Targets

# Energy Objectives and Targets

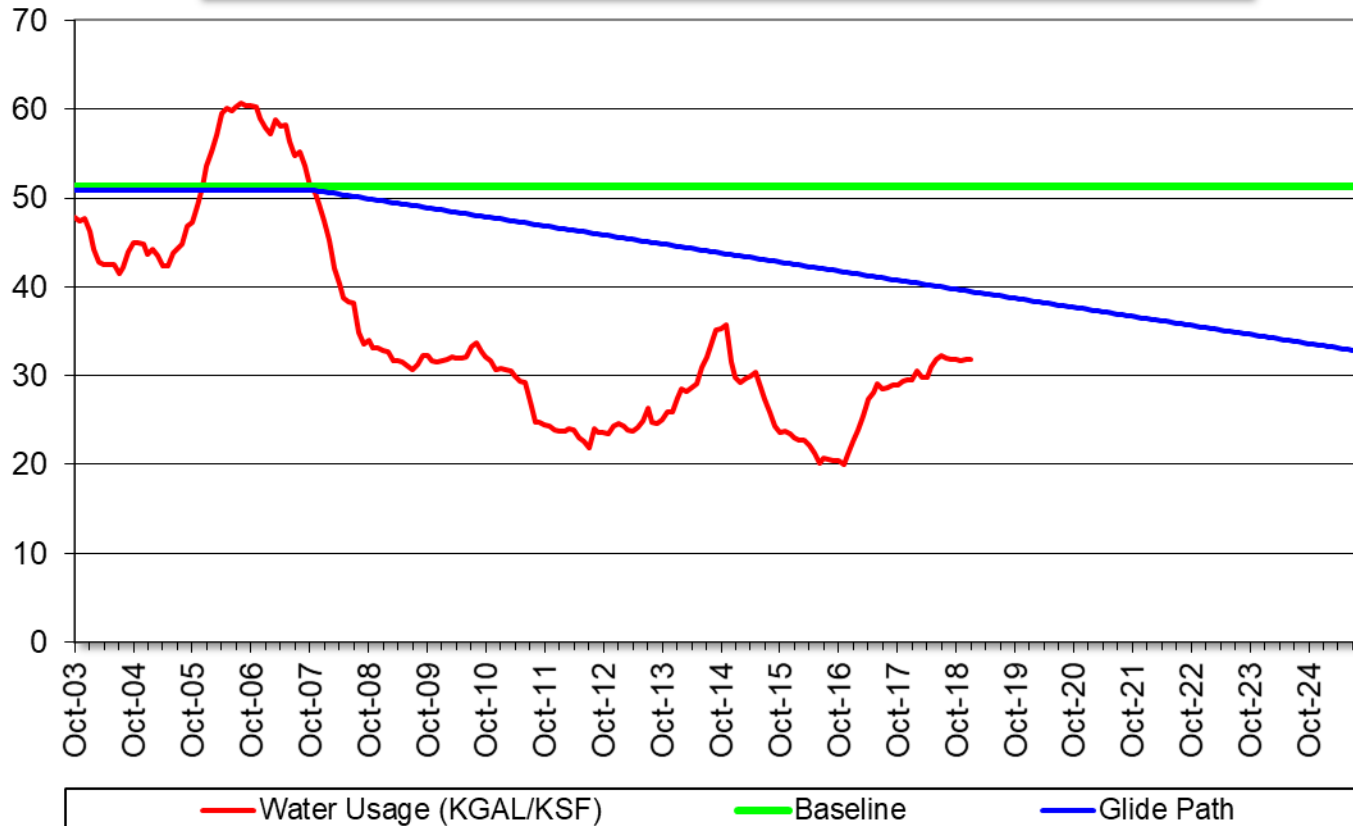

## MCAS Beaufort Water Intensity

1st Quarter FY 2019 Reduction Progress 38% Below FY07

Objective: Potable Water Consumption Intensity by Facilities Reduced by 36% of FY07 Levels by FY25

Potable Water Annual Purchase Cost - \$240,257

Annual O&M Cost - \$546,432

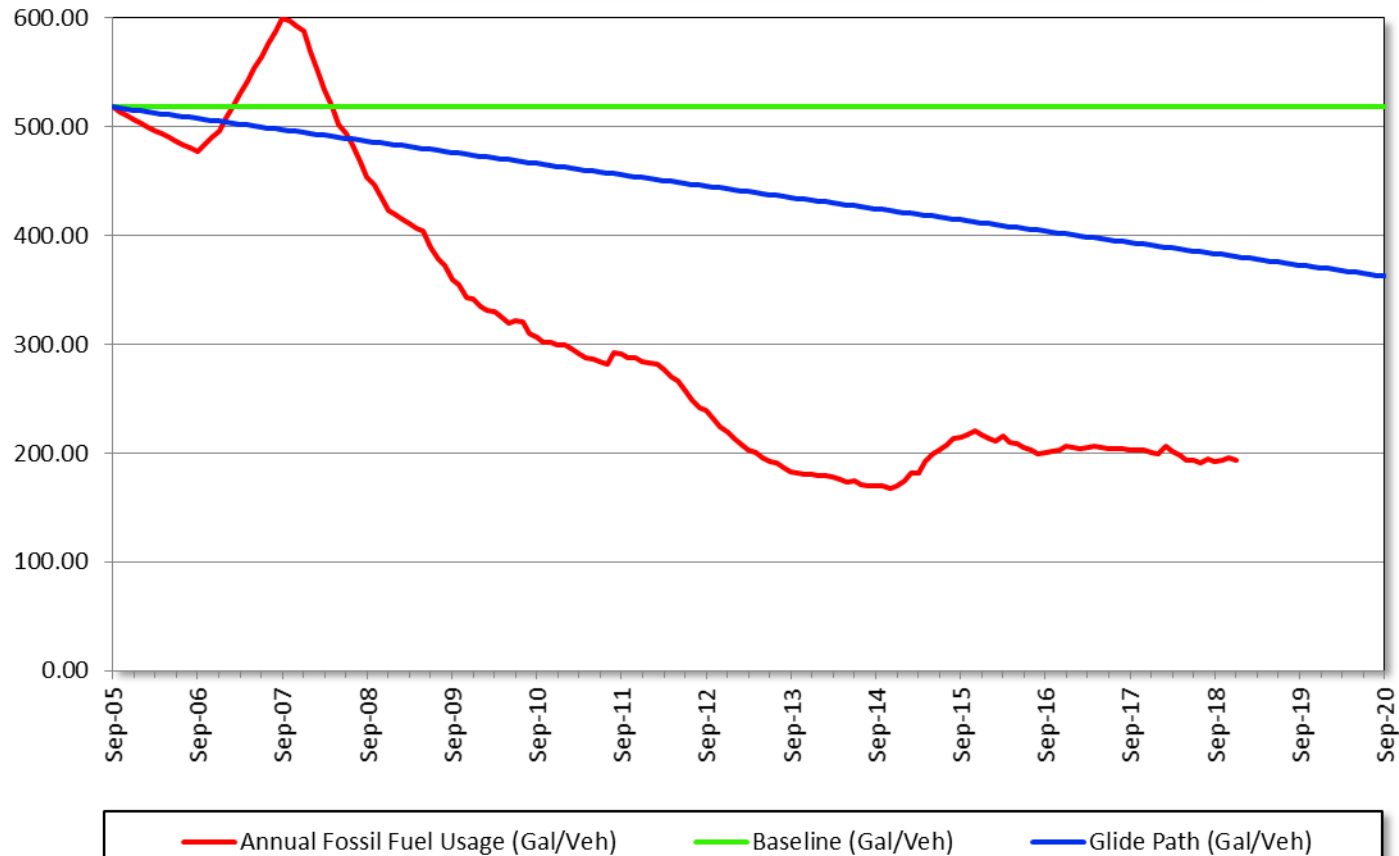

# Energy Objectives and Targets

## MCAS Beaufort Fuel Intensity

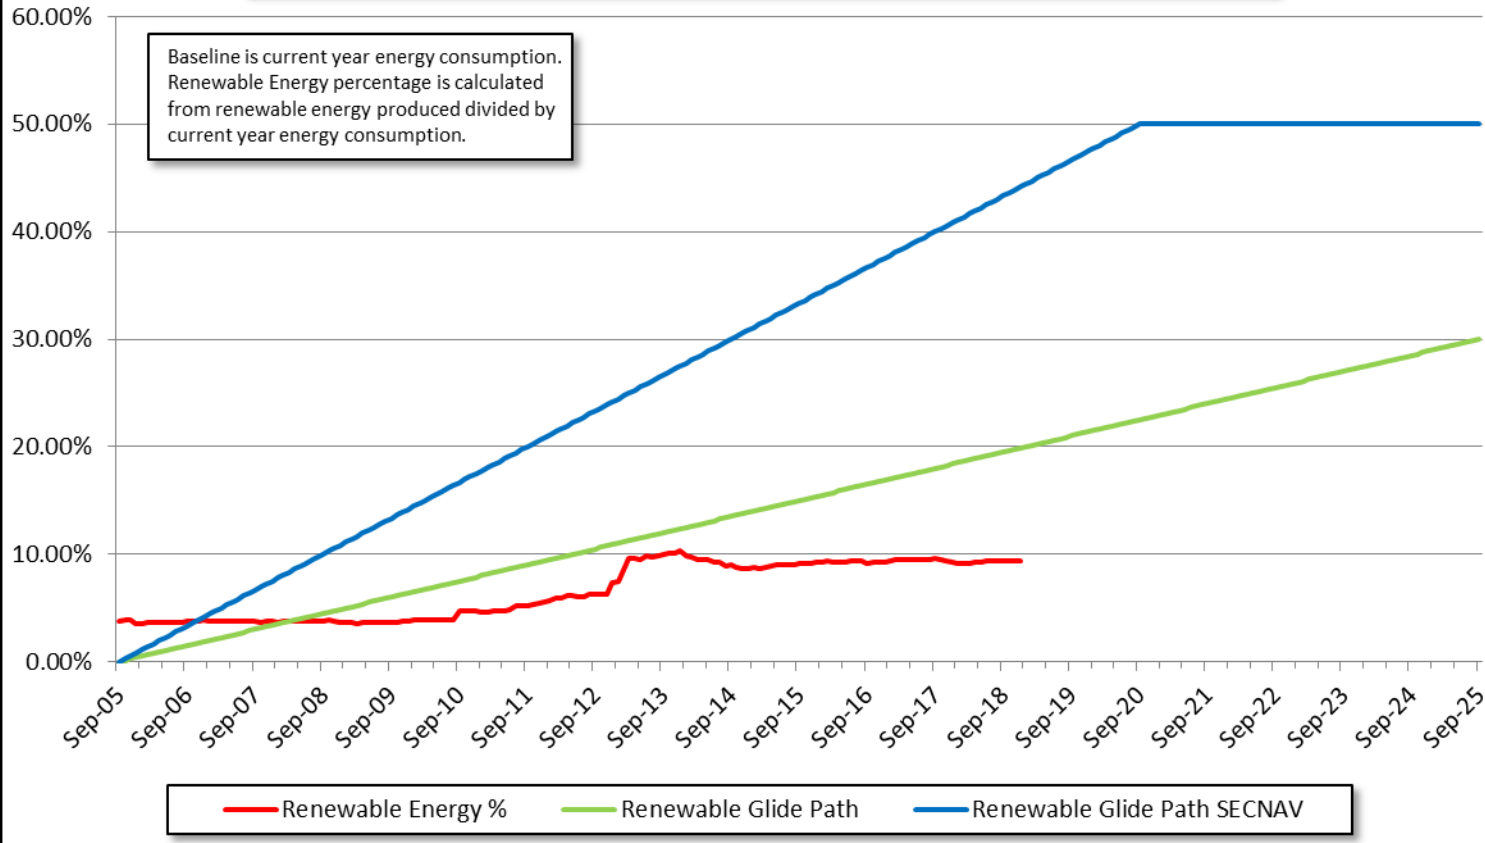

1st Quarter FY 2019 Reduction Progress - 61%

Objective: Use of Petroleum Products by Vehicle Fleets Reduced 30% by FY 2020 Relative to FY 2005

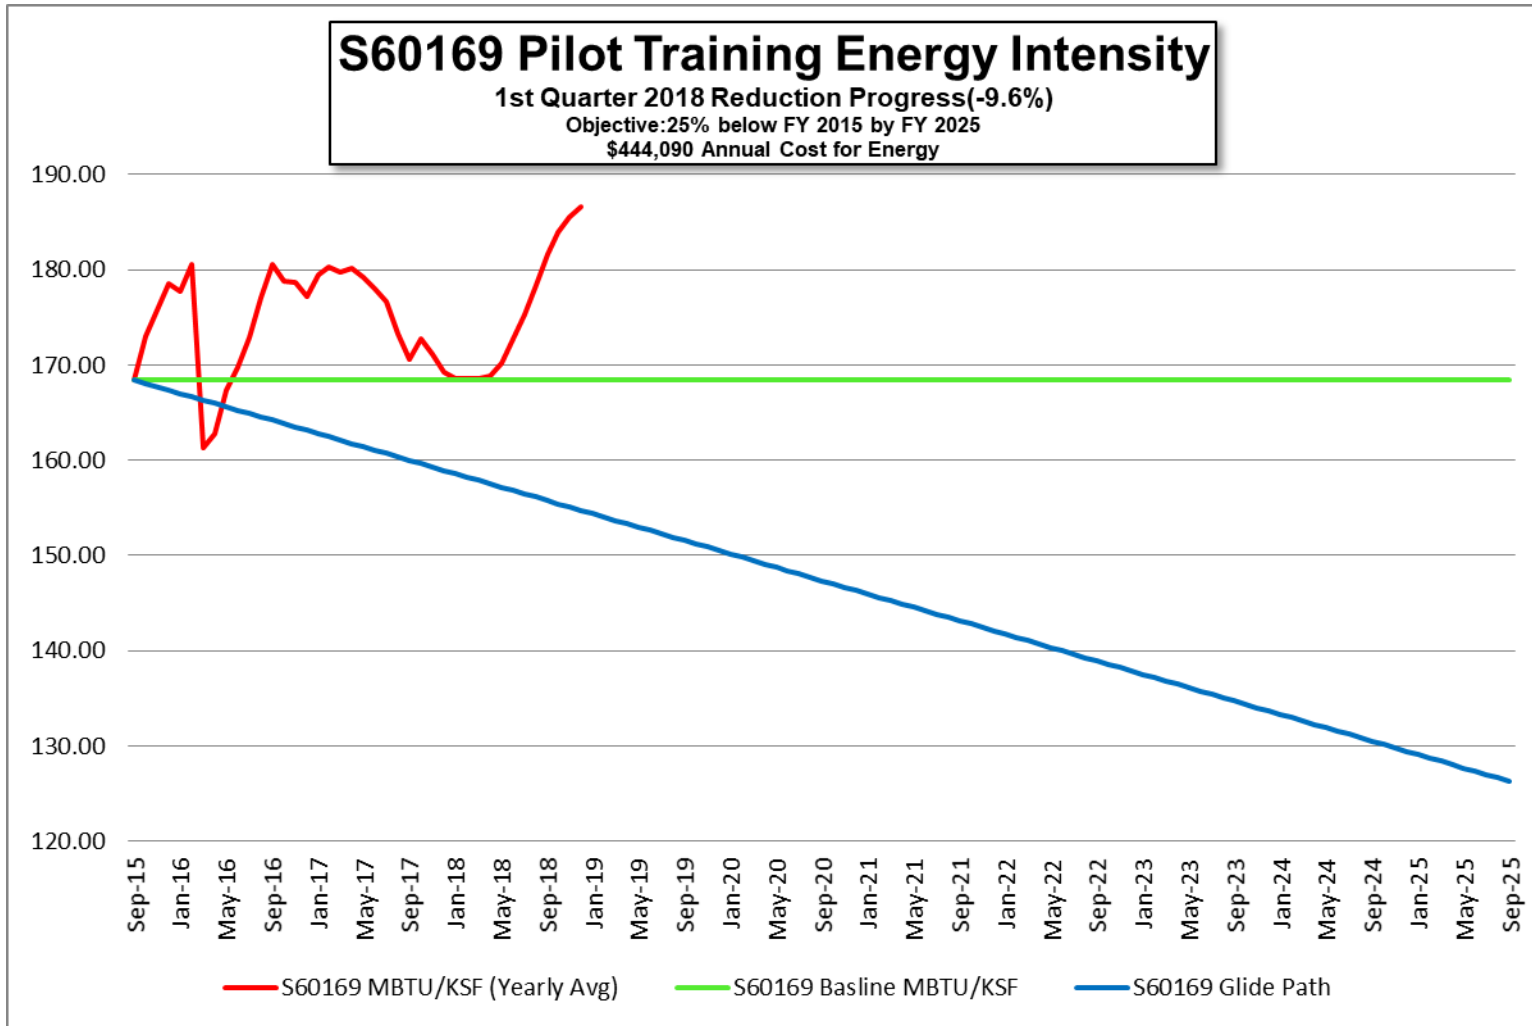

# Energy Objectives and Targets

**MCAS Beaufort Renewable Energy Progress**  
1st Quater FY 2019 - 9.3%  
Objective: 30% of Energy Consumed by Facilities is Produced or Procured from Renewable Sources by FY25  
50% by FY20 SECNAV Goal

# Significant Energy Uses

# Significant Energy Uses

**X60169 Corrosion Control Facility Energy Intensity**  
1st Quarter 2019 Reduction Progress (-151%)  
Objective: 25% Below FY2015 by FY 2025  
Current Annual Utility Cost \$157,712

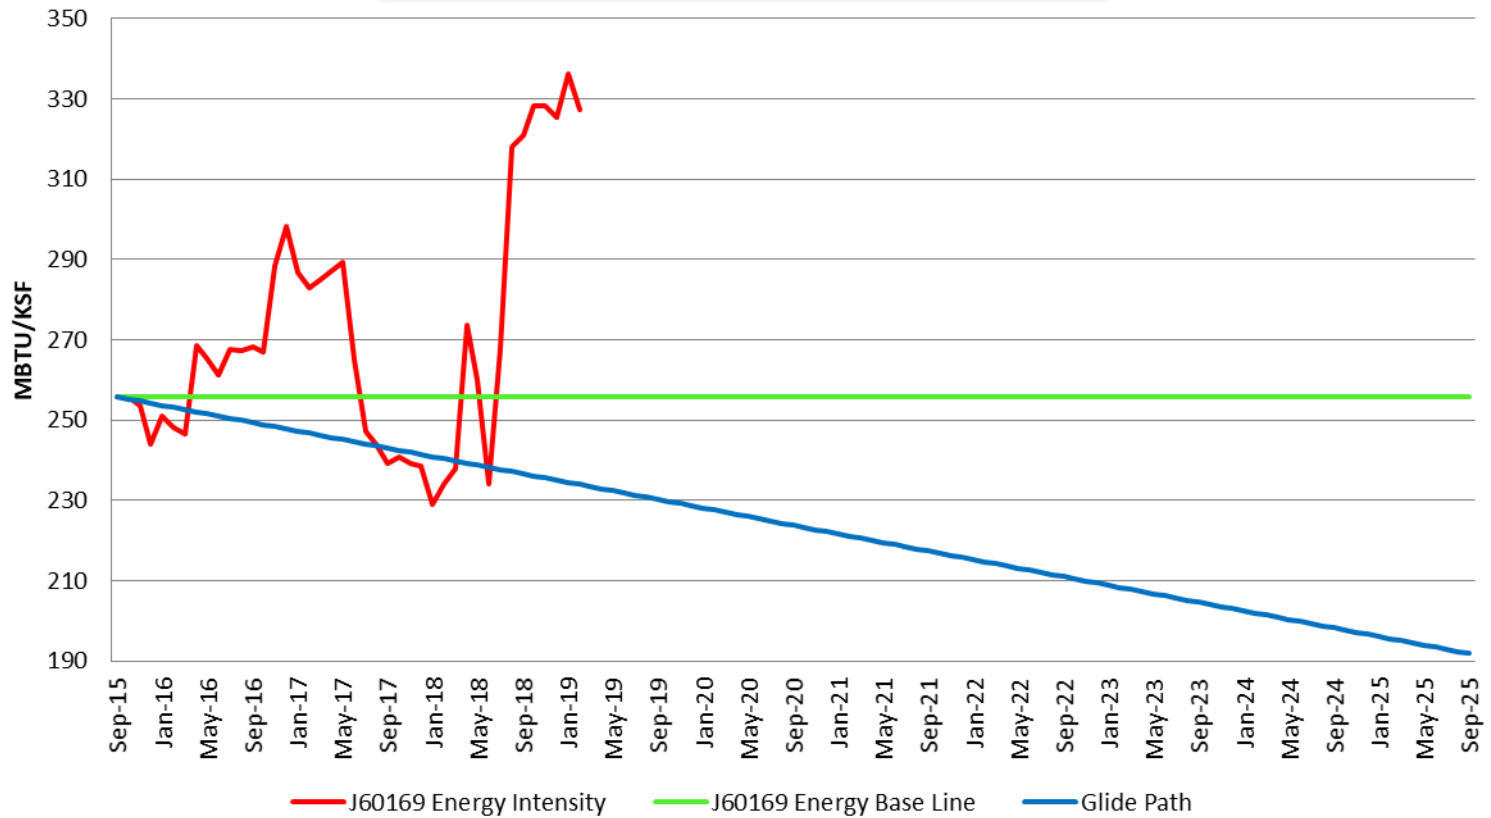

# Significant Energy Uses

## J60169 Mobile Van Energy Intensity

2nd Quarter 2019 Progress 28% Above 2015 Baseline

Objective: 25% Below FY 2015 Baseline by FY 2025

Current Annual Utility Cost \$339,449

# Significant Energy Uses

**C60169 Cogeneration Annual Energy Generation**  
4th Quarter 2018 Electricity and Hot Water  
Current Annual Utility Cost \$113K
