

MARINE CORPS AIR STATION BEAUFORT SAFETY POLICY

The MCAS Beaufort safety program is critical to the mission of this Air Station. It is essential in the prevention of injuries, property or aircraft damage, and lost work hours. The most valuable asset we have are the Marines, Sailors, civilians and family members that make up Team Beaufort. We currently have an outstanding and effective safety program and culture, and it is up to each of us to keep it that way. We are all responsible to continue this legacy of excellence in order to provide the members of Team Beaufort with a safe and healthy work environment, free from hazards and compliant with all policies and regulations.

Every member of Team Beaufort has a responsibility to point out safety or health hazards that will hinder us from accomplishing our mission. This includes taking any action necessary to mitigate hazards before an accident or mishap occurs. Fostering a culture of risk management and caring about fellow Marines, Sailors, and civilians is critical to our continued success. Everybody is a safety officer and anybody can stop the chain of events leading to a safety incident.

If you see something, say something!

Vigilance and standardization are the keys! You have done an outstanding job contributing to our success and professional excellence. Continue to focus on our excellent safety practices and resist complacency in your approach towards safety.

Endstate: Our endstate is clear:

- Zero preventable aircraft mishaps.
- Zero preventable ground mishaps.
- Zero preventable personal motor vehicle injuries or fatalities.
- Zero preventable off-duty recreational injuries or fatalities.

Mark D. Bortnem
Colonel, United States Marine Corps
Commanding Officer
